

Small Tool Tracking 4.0

Powerful new benefits from your tool tracking software.

User Custom Report Writer – Now configure your own custom reports with our new Custom Report Writer or have Landmark do it for you.

New Data Export Options – Export your reports, including custom reports, to PDF, Excel, Lotus, Quattro, HTML or RTF file formats.

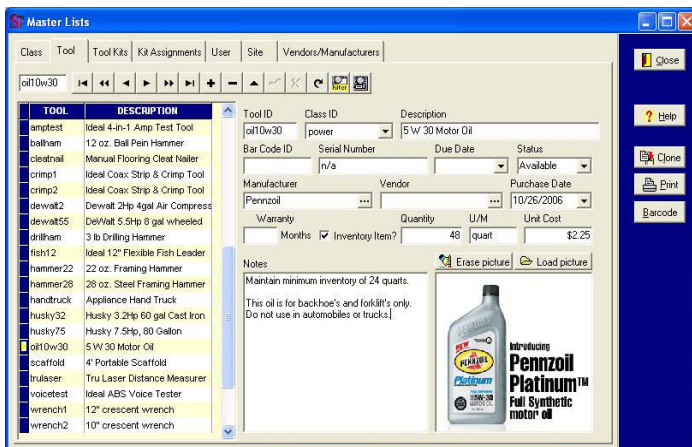

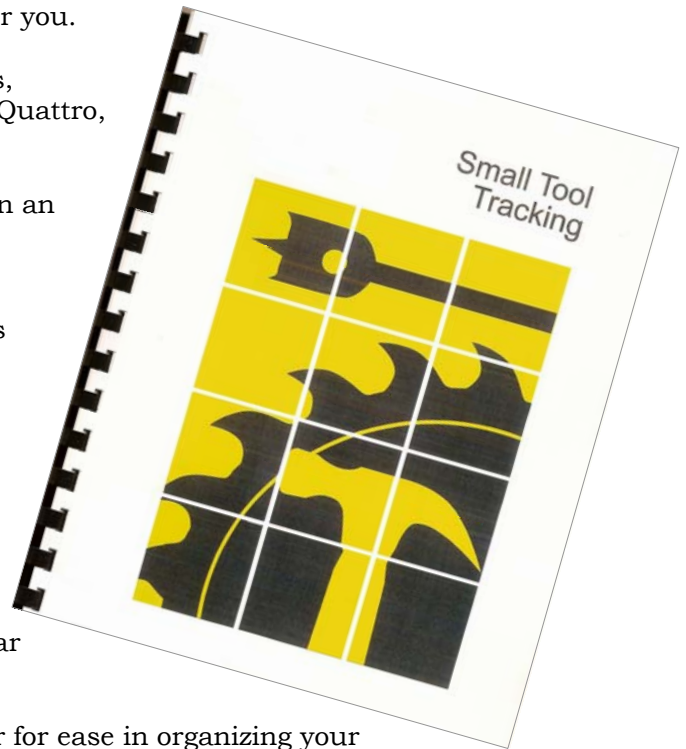

Multi-company capability – Track tools easily in an unlimited number of companies with added user/password protection.

New Inventory Items – Designate items such as hammers, ladders, motor oil and shovels as inventory items tracking quantity on hand, quantity checked out and unit price.

Tool and Kit Pictures – Load pictures of tools and kits and view them in the Master Lists, By Tool Inquiry, or print them on custom designed lists or labels.

Bar Code Labels – Print your own customized bar code labels on vinyl stick-on labels.

Sites – Locate your tools by Sites as well as User for ease in organizing your tool inventory by jobsite or company divisional office.

Enhanced Activity Log – Now easily track a tool's history with check out and check in user and date information in the Activity Log.

Revised Documentation and Help Screens – All new illustrated manual with context sensitive help screens throughout the program.

Improved Performance – Is now built on Sybase's Adaptive Server Anywhere database making it fully compatible with Windows XP and Vista plus

Windows Server 2000 and 2003 as well as older versions of Windows such as 98, Me, 2000 Workstation, NT and NT Server.
