Have trouble keeping up with your company’s tools?
Reduce tool loss and misuse with the easy-to-use tool management program that makes employees more accountable for their tools.

Small Tool Tracking
With Small Tool Tracking, you can classify tools and assign them to the employees, trucks, job sites, warehouses, tool boxes, and other locations responsible for the care of the tools. Check tools in and out on-screen or use the bar code/scanner feature for even more speedy tool tracking!

- Identify and classify all tools in your inventory
- Locate and reassign unused tools
- Track tool repair costs making repair/replace decisions easy
- Use bar code scanning for easy check in/check out and tool look up
- Check out multiple tools at once with optional printed user receipt
- Create tool kits in order to assign multiple tools with a single ID
- Clone existing tool entries to easily add tools to your database
- Record detailed freenotes on all tools, vendors and users
- Audit tool inventory by site or user to insure accuracy
- Use custom data fields to tailor tool data to your needs
- Select and move data columns on check out/check in grids, receipts and more

“Small Tool Tracking has cut our tool loss by 98 percent. We haven’t seen a program we would like better.”

– Electrical Contractor, Kinston, NC

Features and Benefits
- Use multiple companies, password security, and an easy to use built-in backup.
- Generate custom reports with our new, simplified custom report writer.
- Enhanced status codes, return due dates, freeform notes and pictures are a few of the Tool List features.
- Print your own bar code labels on stick-on labels.
- Assign tools to a Site as well as check them out to Users.
- Search by Tool ID or Bar Code ID displaying last check out, last check in user and date plus a picture of the tool.
- Additional detail in the Activity Log tracks check out user/date, quantity and user ID.
- Use a single Tool ID to represent multiple, identical tools such as ladders and extension cords streamlining your setup process.
- Make employees accountable for their tools reducing theft and misuse.
- Keep track of your entire tool inventory making it harder for them to “slip through the crack.”
