

Small Tool Tracking

Landmark Data Systems, Inc.
800-424-8178

Minimum System Requirements

Single User

Windows XP with 512mb memory, 100mb free disk space, free USB port if using bar code scanner.

Windows Vista/Windows 7 with 1gb memory, 100mb free disk space, free USB port if using bar code scanner.

Peer-to-Peer Network

Server: Windows XP/Vista/Windows 7 with 1gb memory (2gb recommended), 100mb free disk space

Client: Same as single user except only 10mb required for the program.

Dedicated Server

Server: Windows Server 2000, 2003, 2008, SBS – 100mb free hard disk space, memory dictated by other applications on the server

Client: Same as single user except only 10mb required for the program.

Notes:

- Vista installs may require disabling UAC before installing the program.
- Remote access through a Windows Terminal Services/RDP connection is supported.
- If tool pictures are implemented, larger server disk capacity may be required depending on the number of tools in the database.
